**Re: ONGOING CHANGES TO EFFECT CE MARKING OF
 THE NUDURA® INTEGRATED BUILDING TECHNOLOGY
 INSULATED CONCRETE FORM SYSTEM**

As part of NUDURA's efforts to attain Product Approval throughout Europe, the process for completion of formal CE Marking of the form system is still in process, which involves formal embossment of the system's major components to identify clearly not only the CE Mark, but also the associated International European Approval Assessment Number verifying the BBA (British Board of Agrément) review of the System's compliance to ETAG Document No. 009 "Guideline for European Technical Approval of NON-Load Bearing Permanent Shuttering Kits/Systems Based on Hollow Blocks or Panels of Insulating Materials and Sometimes Concrete". The system has been listed under Approval No. ETA 07/004. NUDURA Corporation also maintains an active Certificate of Factory Production Control with the BBA (No. 07/009) which covers manufacture of all products being manufactured for us throughout Europe.

This process is expected to be formally completed by April 30/09 at the latest. When completed, the CE marking will appear as a vertical embossment directly in the surface of the foam panel on either side of every 3rd standard form as illustrated at right. Completion of the Declaration of Conformity is ALSO expected to be completed by the above noted date

Should you have ANY questions PLEASE do not hesitate to contact me or any of the technical staff here at our offices.

Very best regards,

A handwritten signature in black ink, appearing to read "Keven Rector".

Keven C. Rector, B.Tech.ARSC.
